Tasklists	Description	Progress	Status																																
Build 1.27																																			
Implement the pragma: no cache header	reference link: http://stackoverflow.com/questions/10314174/difference-between-pragma-and-cache-control-headers		Not Started																																
• Investigate unique query solution	Please investigate and recommend a solution that will work in as many scenarios as possible to prevent browser content from caching in any form.		Not Started																																
Change Log	Create an ongoing changelog that is submitted to git in a folder called Changelogs each month. Changelog is any change made to the build. It could be as simple as: Dec012014 v1.22 - bug fixes - performance optimization - sentinel data import etc, etc	10%	Started																																
Quick Add Feature	Add Quick Add to every Claim Dropdown that exists in the Dropdown Lists area.	90%	Started																																
Reporting Enhancements	Workout UI enhancements for Reporting.		Not Started																																
	With the existing dropdown in Admin Contact, we need to be able																																		

	Admin Contact Branch Identification	to identify what Region/Branch the Contact belongs to.		Not Started
	Remove expired sessions	Currently, there are almost a million rows in the session table. This shouldn't be the case, because that table should be cleared of expired sessions on a regular basis. This can either be done via a cron job or as part of a regular action (maybe logout). Can you give some ideas on how you would accomplish this and then we'll discuss before you execute.		Not Started
