		Providing the ability to keep track of the document			

	Expanding Documents Functionality	folders (global docs) more effectively. The whole adding info to the filename thing does not work and as you can see from the production database, sorting through a larger number of documents is problematic at best (as I predicted). Marcus and I discussed a fix (by client and by document folder). I believe this needs to happen to make the software more effective (for Matrix especially).			Not Started
